Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on May 19, 2003 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date U.S. Patent No. 6,080,905 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Response to Amendment

The rejection of claims 11-18 under 35 USC § 112 is withdrawn by the examiner in view of the amendment filed on May 19, 2003.

The rejection of claims 1-20 under 35 USC § 102(b) anticipated by Kaminsky et al. (6,0980,905) is withdrawn by the examiner in view of the amendment filed on May 19, 2003.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

Art Unit: 1764

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kaminsky et al. (6,080,905).

Kaminsky discloses a process for purification of olefins by contacting an olefinic feed with an adsorbent, which is the same as the claimed adsorbent, to remove acetylenes from the feed. The spent adsorbent is then regenerated by contacting it with a hydrogen gas stream to remove acetylenes from the adsorbent. The adsorption step is operated at conditions that are the same as the claimed operating conditions. (See col. 5, line 37 through col. 10, line 3; col. 11, line 35 through col. 12, line 12; col. 16, lines 54-56)

Kaminsky does not specifically disclose that the reduce gas contains less than 0.5 ppm of carbon monoxide. However, Kaminsky discloses that **pure hydrogen** has been shown to work well in regenerating the acetylene-saturated adsorbent (see col. 15, line 41-42; col. 16, lines 54-56). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the process of Kaminsky by using a reducing gas (e.g.,

Art Unit: 1764

pure hydrogen) that contains less than 0.5 ppm of carbon monoxide because pure hydrogen is effective in the regeneration step.

Response to Arguments

The argument that Kaminsky does not teach or suggest the use of a reducing gas comprising less than 0.5 ppm of CO is noted. The argument is not persuasive because of the new rejection above. It is reminded that Kaminsky only prefers to use a tail gas which comprises 100 – 500 ppm CO because such tail gas is cheaper than pure hydrogen.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
